S/P2 Mechanical Pollution Prevention Asbestos

Separate and Label Area

Everyone working in or around the area where asbestos work occurs should have the risks thoroughly explained to them. They must be educated to appreciate the significance of the warning signs, so to be sure that all employees comprehend the hazards that exist. The use of signs in *foreign language* if necessary, plus *pictographs* and *graphics* is recommended.

keep in mind

If possible, an area should be designated for all brake and clutch repairs. Entrances into this area shall be posted with an asbestos exposure warning sign as follows:

Asbestos - Dust Hazard
Avoid Breathing Dust
Wear Assigned Protective Equipment
Do Not Remain in Area Unless Your Work Requires It
Breathing Asbestos Dust May Cause Asbestosis and Cancer
AUTHORIZED PERSONNEL ONLY
