Subject: [SPAM] U. S. Government Human Experimentation on Pregnant Women

Dear Dr. Martino-Taylor:

I wrote to you a few years ago to discuss your work with unethical human experimentation on American citizens for research in my book, Blood of a Sentinel Son.

While I'm still researching my book, congratulations on your recently published book. Highly disturbing in nature, the questions being asked here and now by outraged Democratic members of the House deserve answers:

<http://abcnews.go.com/Technology/wireStory/cold-war-radiation-testing-us-widespread-author-claims-50233516>

I am writing again because of a FOIA letter that I received over the weekend which downplays the urgency of my request for information that involves experimenting on pregnant women and their offspring.

Results from a NIH/NIEHS/EPA grant published in Environmental Health Perspectives in SEPT 2017 demand the U.S. GOVERNMENT stop human experimental projects that fluoridate pregnant women and their offspring, including drug trials and fluoridated tap water.

I am appealing to you to forward my concerns to Congressmen William Lacy Clay of Missouri, Brad Sherman of California, and Jim Cooper of Tennessee. There is a need for a broader investigation into why employees of the federal government, including scientists and non-scientists, are continuing to recommend human toxicological experimentation on pregnant women. The extensive money trail and conflicts of interest with positions of authority are potentially unethical and illegal.

Since the Trump Administration has taken office, I have been denied meetings with HHS, EPA, FDA, NIH, NIEHS/NTP, and CDC/ATSDR to collectively call for the ethical end to water fluoridation. As a pregnant water poisoning victim that resulted in devastating consequences to my offspring, it is imperative that this condescension that keeps women in harm's way of a known environmental hazard come to an end.

If you ever have time, please read this Congressional transcript from 1954:

https://archive.org/stream/fluoridationofwa00unit/fluoridationofwa00unit_djvu.txt

There is overlap with your work into unethical human experimentation with radiation and the history of water fluoridation.

Thank you,

Jill Jennings-McElheney
Water Poisoned Victim
