RE: UPDATED MSDS FOR FMG FRICTION MATERIALS

Dear Dan:

Enclosed are updated copies of MSDS for the various friction material types supplied by AlliedSignal. These include:

1. Organic Segment
2. Organic Disc Pad
3. Semimet Disc Pad
4. Asbestos Segment

The material types (listed under edge code on page 1) may not cover all of the private brands and new customer descriptions that may come up. When you purchase parts with new edge codes, let me know and I will update the appropriate MSDS.

The earlier MSDS set did not cover all the parts you purchase from us. Please accept our apology for the oversight.
