SUBJECT MONTHLY PROGRESS REPORT - FEBRUARY 1980

IN REPLY
REFER TO RTC:80-23

DATE 2-27-80

I. NEW PROJECTS

- A. General Atomic Company
Investigated and recommended control measures for a solvent degreasing operation using chloroform as solvent.
- B. GOCHEM
Preparation for a presentation to the President of GOCHEM on industrial hygiene concerns and recommendations of GOCHEM Asia operations.
- C. GORAM - Santa Fe Springs
Assisted in the preparation of defense in a law suit filed by a refinery worker who claimed neuropathy injury due to n-hexane exposure.
- D. GOCHEM and GORAM - Asia Operations
Started planning for the keyperson training program for trainees from Korea and Taiwan.

II. COMPLETED PROJECTS

- A. GOCHEM - International, CGPC
Completed a comprehensive industrial hygiene survey report for China Gulf Plastics Corporation. Occupational exposures to vinyl chloride remained to be a severe health hazard. Exposures to PVC dust and dusts of lead, cadmium and chromium were also high. Impressive progress was made by CGPC in the areas of mercury vapor control and solvent vapor reduction.
- B. General Atomic Company
Completed an environmental particulates survey for the General Atomic Company. Results showed compliance with San Diego Air Pollution Control District Standard.
