SUBJ: HEALTH TESTING - UNUSED EXAMS

I have discussed Bill Maxon's proposal with Dr. Drumwright. He will be discussing the administration of such a program and the potential problems with you in detail. Most of the issues are of an employee relations nature and he is more familiar with them than I am.

One other consideration would be the potential change in our testing requirements based on the respirator user medical status policy Dr. Drumwright and I are working on. This may result in a more efficient utilization of the testing van.

Thomas G. Grumbles
