

Journal of Occupational Medicine

Official publication of AMERICAN OCCUPATIONAL MEDICAL ASSOCIATION

VASCULAR DISEASES IN EMPLOYED MALES

Vascular diseases, among the leading causes of absenteeism, and the leading cause of death, have a strong association with hypertension. Analyses of data obtained from a large steel mill's surveillance are presented beginning on p. 425.

RETROSPECTIVE SURVEY OF ALLEGED DISEASES ASSOCIATED WITH VINYL-CHLORIDE

International cooperation is essential in establishing standard values for VC, says this report from West Germany. This cooperation can be successful if all investigations and statistical evaluations are standardized. p. 430.

ORGANIZATION AND OPERATION OF AN OCCUPATIONAL HEALTH PROGRAM — PART II

This second installment of a three part series discusses design of dispensary facilities in industrial plants and other facilities. See p. 433.

SMOKING BEHAVIOR AND ITS CONSEQUENCES

As a prelude to an extensive Australian investigation into smoking and associated ill-health in industry, this review was undertaken to explore means for changing smoking behavior. p. 441.

RECOMMENDATIONS FOR A COTTON DUST STANDARD

Publication of this Criteria Document review marks resumption of the JOM's popular series of commentaries. p. 457. Further commentary is supplied, by invitation, on p. 467.
