of more questions.

BY MR. SMITH:

Q And what was your understanding as to the results of that study that you mentioned?

A It is my understanding that Selikoff's paper established the relationship between asbestos in the lung and at that point in time a relatively unknown or little known form of cancer called mesothelioma.

This was my first exposure to that term.

Q If I understand your answer correctly, you first learned of the disease process asbestosis prior to joining Ehret Magnesia in 1952?

MR. SMITH: Then there is an objection.

BY MR. SMITH:

Q When did you first learn of the disease process asbestosis as distinguished from mesothelioma?

A I learned of the potential for asbestosis while I was with Owens-Illinois.

MR. SMITH: Page 76.
