Plant Laboratory Audits

The following plant laboratories have been audited:

	Dept.
Oxo Alcohols	48
HCN-TBA-LN-ACY	19, 25, 27 & 29
Power 2 & Water Treating	
Styrene	15 & 16

A common safety concern throughout the plant is no eye baths in any of the labs. Also the reagent barium chloride is not labeled as a poison.

A special TCSC meeting will be held Monday, October 31, 1983 in the Research 1 Conference Room at 8:30 a.m. to discuss these concerns and make appropriate recommendations.

Fall Semi-Annual Inspection

The Fall Semi-Annual Inspection was conducted on October 10, 1983. The inspection showed much improvement in laboratory and PT Warehouse housekeeping. Some offices in the Office Annex were still cluttered with file boxes and excess furniture, but the Tech Center showed general improvement over the last several inspections.

Video Tape on Hearing Conservation

Industrial Hygiene Group has requested that TCSC assist them in presenting a video tape on Monsanto's Hearing Conservation Program. Required by a new OSHA regulation the tape is to be shown to all personnel. The tape will be shown in Research 2 Conference Room on November 3, 4 and 7 every half hour from 1:00 p.m. to 2:30 p.m.

New Members

Two new members were elected to the TCSC. They are Glen Olson, an engineer in the AN Tech Service Group and Kaz Finney, a Chemist in Plastics PPR Lab.

Next Meeting

The next regular TCSC meeting will be held on Thursday, November 17, 1983, at 8:30 in Research 1 Conference Room.
