Mr. J. H. Schaefer,
Ethyl Corporation,
Chrysler Building,
New York City 17.

Dear John:

With reference to your letter of April 5 and the possibility of my initiating a meeting between representatives of du Pont and Ethyl, this is to let you know that I expect to be in Wilmington very shortly. I am preparing a rather elaborate report on certain phases of our problems, making use of our data which have been extensively but not completely analyzed. In connection with the presentation of this report, I should like to have a number of the representatives of both Corporations present, and I think this would be a very good time to consider the problem you have in mind. In fact, my report will bring into relief the extent of the lead contamination of the area in general, and this should be a good starting point for discussion. I shall see if we cannot set a definite date shortly.

Sincerely yours,

Robert A. Kehoe, M. D.

PLEASE ADDRESS REPLY TO
CHRYSLER BUILDING
405 LEXINGTON AVE., NEW YORK 17, N.Y.

Dr. R. A. Kehoe
College of Medicine
University of Cincinnati
Eden and Bethesda Avenues
Cincinnati, Ohio

Dear Dr. Kehoe:

This will acknowledge with thanks your letter of April 1 in which you commented on Mr. Rieger's views concerning the hygienic problem at Deepwater.

The several proposals for providing suitable mechanical equipment to correct the unsatisfactory conditions at Deepwater are, as you know, being actively investigated, and these investigations will continue until the best course to pursue is indicated. At that time, it would appear that further discussions should be held between interested persons to determine the degree to which corrective facilities should be installed.

Very truly yours

J. H. Schaefer
