1 page has been transmitted. If you do not receive it in legible form, please phone (410) 263-1584.

MESSAGE:

Do you have a good copy of pages 260 to 276 in the appendix to your dioxin report. It is part of a section titled "Kettering Laboratory. Report on a clinical and environmental survey, Monsanto Chemical Co., Nitro, W. Va. Unpublished. July 20, 1953." It starts on page 238 of your appendices. In the original copy you sent us there were unreadable pages. Can you express these to us? Thanks.

Maria

Re: pages 260-276 of exhibits to our report

Hi Maria --

Here are fresh copies of these pages. As you can see, they're still pretty poor. The original's pretty bad, too, it's from the Kemner case, so maybe we can get better copies from Carr. I hope these are better than what you have, anyway. I think they're at least legible.

Paul may stick a few more things in here before the school bus comes (the driver will get it to the Fed-ex box for us).

Best wishes --

Ma Kettle
