Matthew Brown
Assistant Regional Engineer
General Water Works Company
25 Commerce Road
Newtown, Connecticut 06470

Dear Mr. Brown:

Thank you for your inquiry of March 12, 1984 regarding the safety of A/C water pipe. It is understood that General Water Works Company has been directed by the Main Public Utilities Commission to respond to a citizen's petition that, among other things, raises questions about the company's use of A/C pipe in Millinocket.

Enclosed are (1) a complete package of scientific/medical studies on the potential health effects of asbestos in drinking water and (2) Comments of the Association of Asbestos Cement Pipe Producers on EPA's Advance Notice of Proposed Rulemaking on National Revised Drinking Water Regulations. If you require additional information to prepare written or oral testimony for the June public meeting, please do not hesitate to call.

Very truly yours,

A/C PIPE PRODUCERS ASSOCIATION
