FILE: Vermiculite Concentrate Labels

The Director's Conference Room has been reserved for a meeting 9:00 am, Monday - November 28, 1983. The purpose of this meeting will be to discuss the data base necessary to support removal of the asbestos placard from vermiculite concentrate rail cars.

Specifically, we need to define:

1. The exposure level at which OSHA Regulations no longer require placarding.

2. The number and types of locations where sampling will be necessary.

3. The minimum number of samplings necessary at each location.

Please let me know if you will be able to attend.

Thank you.
