ASBESTOS - CHAR LAB PUTTY

Char-lab Putty (used for sealing gaskets at Seneca Plant AOP Unit) contains asbestos. Would you please review if this has been used by any one in your group by 4/26/78 and notify me. If the material was used we will need to monitor this location.

As noted earlier (3/30), monitoring is required in the vicinity of "Garlok" gasket cutting or storage. Please advise me if you are cutting any "Garlok" gaskets so monitoring can be started later this month.

If you have any questions, please contact me at ext. 461. Thanks.
