Below is the suggested label to be used on our desert talc products. The _____ % fibrous Tremolite will read 15% for G-1 crude produced products and 7% for G-2 crude produced products.

CAUTION

CONTAINS ASBESTOS FIBER
AVOID CREATING DUST
BREATHING ASBESTOS FIBER MAY
CAUSE SERIOUS BODILY HARM.

agreed
to bring
This commercial talc product ~~may~~ contain ~~a~~
~~maximum of~~ _____ % fibrous Tremolite, which
has been classified by O.S.H.A. as an asbesti-
form mineral. However, under normal conditions
of usage, with adequate dust control as is
currently required by O.S.H.A. mineral dust
standards, ~~the use of this product will also~~
~~comply~~ with O.S.H.A.'s standard for exposure to
asbestos dust.

CAUTION

PROLONGED EXPOSURE TO EXCESSIVE
QUANTITIES OF TALC ALONE CAN
BE INJURIOUS TO HEALTH. AVOID
CREATING AND BREATHING TALC DUST.
RESPIRATORS OR DUST MASKS APPROVED
BY N.I.O.S.H. OR THE BUREAU OF MINES
ARE RECOMMENDED.
