cc R. M. Quarles

References: 1) Our meeting, October 3, 1978
2) August 3, 1978 letter from A. F. Magewick to L. K. Lee

Following our discussion of Mr. Magewick's concern of possible exposure to excessive airborne concentrations of asbestos fibers, I talked with Mr. Ted Miloch, Office of General Counsel. Pertinent issues were discussed with Mr. Miloch.

Mr. Miloch recommended:

- We should not respond to Mr. Magewick's letter in writing.
- The results of air sampling tests performed by Mr. Lee should be fully explained to Mr. Magewick. He should have an opportunity to see the data sheets of Mr. Lee's reports.

The settled dust samples obtained by Mr. Magewick and Mr. Quarles have been submitted for asbestos analysis. Results will be interpreted and reported to you.
