Re: Vinyl Chloride Safety Association

Dear Mr. Asti,

We are sole manufacturers of vinyl chloride monomer and polymers in Israel; we supply the entire local market as well as export to many countries. We produce approximately 50 million pounds per year of suspension-grade PVC in two buildings with a third building of 100 million pounds per year in the planning stage. We also produce some 5 million pounds per year of emulsion-grade PVC (Plastisol) resins. In addition, we produce 25 million pounds per year of vinyl chloride monomer, all of which is used in the polymer plants.

We are writing to you in order to obtain further information on the Vinyl Chloride Safety Association with the idea of joining as soon as possible. We would appreciate it if you would send us the pertinent information concerning the Association as well as conditions of membership.

We believe our membership will prove mutually advantageous in many aspects of the Association's work in health and safety matters concerning vinyl chloride monomer and polymers.

Very truly yours,
ELECTROCHEMICAL INDUSTRIES (FRUTAROM) LTD.
