CBS Interview NOTES
w/ Bill Paragorgel

Q- PCB - not really new are they?
First 1880's - Comm 1929
Q. What is so vital about them in terms of wide use?
Heat resistance - explosive
Q. Biodegradability correlation?
A. Yes
Q When prior biodegradability problem surface.
A. 1967 Sweden - 1965-70 Sept. That they were found in environment
Q. Did USNO accident focus attention?
A.
Q What was background of Japanese incident
Q. Was that only human exposure -
Q. What about claims that residuals have remained the same?
MONS 060114
Q. Is there something special about PCB's? Monsanto is a major mfg - yes
Q. Has Monsanto Activated any plan to control future incidents

6.  Several states have taken or are considering taking action to prevent dumping and/or regulate its use - limit or ban use. What would be substitute - would this cause a serious problem to industry -

A If total ban - problem in finding material to distribute power efficiently - comply with electrical codes re fire resistance - trade offs would have to be made -

Q Are you personally alarmed or disturbed by reports re fish - animals, food -

A Alarm - it is that some expectations were unrealistic and have not been met -

Q, Should there be a law to control movement of material from mfg - to destruction -

Q. Do there anything you'd like to add?

$$20\overline{)15.0} \quad .7 \quad 14\,0$$

$$5\overline{)15.} \quad 3 \quad 15$$

$15 / + 5 = 20$

93%
