

December 14, 1932

Dr. W. W. Anderson
United States Veterans Bureau
1015 Vine Street
Cincinnati, Ohio

Dear Doctor Anderson:

I am sending you herewith a report of my examination of Mr. [REDACTED] of 2044 Mills Avenue Norwood, Ohio about whom I spoke to you over the telephone the other day.

Considering Mr. [REDACTED] unfortunate situation at present, I have recommended to him that he make application for hospitalization and medical care at the hands of the U. S. Veterans Bureau. I believe that his only other alternative is to apply for complete and permanent disability compensation. I have urged the former course with the somewhat forlorn hope that the clearing up of his foci of infection may result in an improvement in his condition. In accordance with the statement in my report, I believe this is his only hope for partial recovery.

If there is anything which I can do toward furthering Mr. Haines' claim, I shall be pleased to do so.

Very truly yours,

RAK:IS

Exposure to poisonous materials in spray painting.

No present evidence of occupational injury.

-

- No operation

-

Permanent disability as result of infectious cardiac process.

No

Cannot be answered

-

Hospitalization and removal of foci of infection indicated

None - Diagnosis only.
