WHITTAKER CLARK &
DANIELS

Mr. Clarence U. Driscoll, President
Whittaker, Clark & Daniels, Inc.
1000 Coolidge Street
South Plainfield, NJ 07080

Recently we informed your company that one of its products had been selected for analysis as part of The Cosmetic, Toiletry and Fragrance Association, Inc. Nitrosamine and Nitrosating Agent Review. A copy of our initial letter is attached. The analytical results for your product are as follows:

1. Bentonite USP, Lot #20779 - 1.0 (ppm) Nitrite recovery at 10 ppm level, 7.62 (ug) 76.2%
2. Hydrous Magnesium Silicate, Lot #R0223 - 1.6 (ppm) Nitrite
3. Hydrous Magnesium Silicate, Lot #R0281 - 1.4 (ppm) Nitrite
4. Hydrous Magnesium Silicate, Lot #R0185 - 1.5 (ppm) Nitrite

As we stated in our original letter, the laboratory results relating to your product constitute neither an endorsement nor a condemnation of your product by CTFA. These results do not show, of course, whether other batches of your product would yield similar results. These results apply only to the specific sample tested, and must not be taken to represent a usual, customary, or average value. If you have in your possession any information or data which reflect on the reliability or accuracy of the laboratory results and you would like to submit such information or data to CTFA for consideration by the Nitrosamine Task Force, you should send the information to: Coordinator, Nitrosamine and Nitrosating Agent Review, CTFA, 1110 Vermont Avenue, NW, Suite 800, Washington, DC 20005. Please be advised that CTFA cannot guarantee the confidentiality of your submission if you choose to make one since it must by necessity be considered by the Nitrosamine Task Force. Also, you must agree in writing to waive the confidentiality of the analytical results pertaining to your product or products if this information is necessary to the understanding of your submission.

Sincerely,

Ronald H. Thomas, C.P.A.
